WeRateDogs Insights for Dogs' lovers

WeRateDogs is a twitter account that rates people's dogs with a humorous comment about the dog . these ratings almost always have a denominator of 10 . and the numerators almost greater than 10.

What is the distribution of dog stages ?

In WeRateDogs   they rate dogs and identify their stages
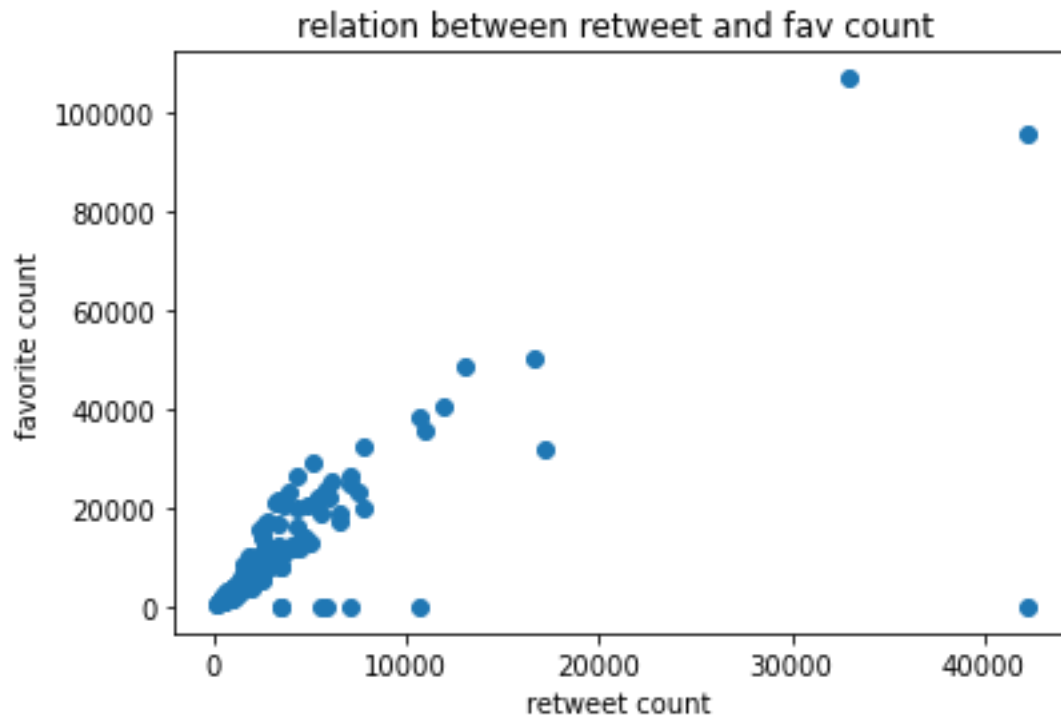

In the next insight I will show you the distribution of the stages of dogs

From this chart it's clear that the pupper stage is the majority of the stages and after it the doggo stage the puppo and finally and the minimum percentage is floofer stage

## What is the relation between re-tweet count and favorite count ?

I have made a scatter plot between re-tweet count and favorite count to discover if there is a relation between them or not , here is the chart with labels

From the plot I have discovered that between retweet count and favorite count there is positive correlation that indicate that this picture had a good impression from the followers .

There is a relation between favorite count and rating numerator ?

I have did another scatter plot to discover if there is a relation between favorite count and rating numerator here is the chart with labels .

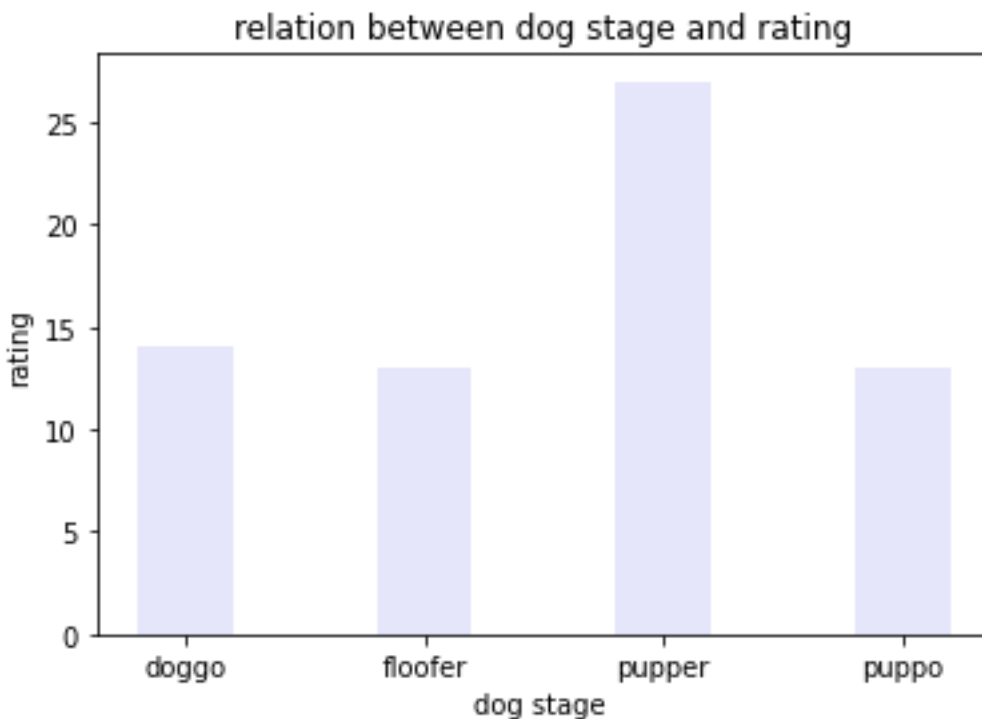

from the chart it's obvious that there is no relation between the fav count and rating numerator .

What is the relation between dog stage and rating numerator ?

I did this time a bar plot to discover what is the most popular and most liked dog stage and have the most rating

So here is the bar plot with labels

From the bar plot we can conclude that the pupper stage has the highest ratings , so pupper is the most liked by WeRateDogs   .
